

CLAIMS

1. A tire label comprising:
a label stock coated on one side with an adhesive,
5 said label stock is one of woven, mesh or knit fabric.
2. The tire label of claim 1 further comprising an RFID insert wherein the adhesive is layered between the label stock and the RFID insert.
- 10 3. The tire label of claim 2 further comprising adhesive on an opposite side of said RFID than the adhesive layer.
- 15 4. The tire label of claim 2 wherein the label stock is selected from the group consisting of polyester, nylon, cotton, organic fiber, synthetic fiber or blends thereof.
5. The tire label of claim 2 wherein the label stock is adapted to conform to an irregular surface.
- 20 6. The tire label of claim 2 wherein the label stock is made of filaments of about 64 microns diameter.
7. The tire label of claim 2 wherein the label stock has a thread count of about 156 threads per inch.
- 25 8. The tire label of claim 6 wherein the label stock has a thread count of about 156 threads per inch.
9. The tire label of claim 8 wherein the adhesive is approximately 3-6 mils.
- 30 10. The tire label of claim 2 wherein the label stock has been one of dyed, pigmented or printed.
11. The tire label of claim 2 further comprising a primer layer between the label stock and the adhesive layer.
- 35 12. The tire label of claim 2 wherein the adhesive layer is approximately 3-6 mils.

13. The tire label of claim 2 wherein the adhesive is selected from the group comprising pressure sensitive, heat seal, UV-cured, epoxy, rubber-based, acrylic based, or a blend of polymers or copolymers and combinations thereof.

5 14. The tire label of claim 2 wherein a pull-tab portion of said label stock is free of adhesive.

15. The tire label of claim 1 further comprising a cap layer, said cap layer on said label stock opposite said adhesive layer.

10 16. The tire label of claim 2 further comprising a cap layer, said cap layer on said label stock opposite said adhesive layer.

15 17. The tire label of claim 15 wherein the adhesive coating is selected from the group comprising pressure sensitive, heat seal, UV-cured, epoxy, rubber-based, acrylic based, or a blend of polymers or copolymers and combinations thereof.

18. The tire label of claim 15 wherein the label stock is adapted to conform to an irregular surface.

20 19. The tire label of claim 15 wherein the label stock is adapted to conform to an irregular surface.

25 20. The label stock of claim 15 wherein the adhesive is approximately 3-6 mils, the label stock is made of filaments of about 64 microns in diameter and the label stock has a thread count of about 156 threads per inch.
